Aquatic Ecology for Sustainability: Priorities, Approaches, and Partnerships for Management and Conservation of Freshwaters

Message from the Guest Editors

Freshwater ecosystems provide valuable services, including clean water for human use, fisheries, and sediment transport. Despite their importance, aquatic habitats are increasingly at risk from human impacts that result in degraded ecosystems, lost benefits for humans, and imperiled wildlife. The aim of this Special Issue is to present advances in the sustainability of aquatic ecology, with a focus on rivers and lakes. We are interested in accounts of research on how to maintain critical ecosystem services and biodiversity and inform sustainable development of threatened riverine ecosystems for the benefit of humans and aquatic life. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
