

## Special Issue

# Sustainable Arctic Shipping

### Message from the Guest Editors

Numerous studies indicate that Arctic ice coverage has been steadily declining for the last couple of decades. Recognizing the rise of a significant opportunity, certain business entities now operate within the wider region, and are harnessing plans to exploit previously untapped resources. A number of credible sources confirm that touristic and fishing activities are clearly intensifying around the Arctic Ocean, with various endeavors of maritime transport also being put forward. As human presence and operations are expected to intensify within that inherently risky region, the issue of sustainability stands out. The Arctic Ocean is now considered a potential connecting corridor between Asia and Europe-America. This special issue will expand global knowledge in relation to the Arctic's truly pristine environment and pave the way towards responsible ocean utilization and management. We are inviting the submission of papers that focus on shipping operations in this still icy region, including cases of future business development and environmental protection issues. For further reading, please visit the [Special Issue Website](#).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
