

Special Issue

Assessing Vulnerability and Resilience to Climate Change Impacts in the Mediterranean Region

Message from the Guest Editor

The Mediterranean is one of the areas of the world that is most sensitive to climate change and yet is also one of the most complex. The mild Mediterranean climate and the proximity to the sea make it attractive to people, resulting in a disproportionately high conversion of ecosystems for agricultural, developmental, touristic, and other human uses. Climate change poses significant challenges to the Mediterranean area and is expected to worsen the already acute situations present in the region.

This regional Special Issue presents original research studies on topics related to climate change impacts and adaptation policies in the sectors most vulnerable to climate change in the Mediterranean area. The main focus is on innovative approaches and climate services that contribute to achieving a sustainable future environment in the Mediterranean region.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
