

## Special Issue

# Aviation Impact on Climate Change

### Message from the Guest Editors

This Special Issue brings together reliable analyses and model approaches including but not limited to the Covid-19 lock down impact on the atmosphere and may lead to new research opportunities towards a sustainable air transport system. It seeks papers encompassing all aspects of aviation-meteorology cause-effect models. Contributions on the impact of air traffic on climate change and on the strategic development of a sustainable air transport sector are also welcome. The aim is to foster further the scientific knowledge on globally sustainable solutions for the air transport system while coping with the IPCC 2° target.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
