

Special Issue

Resilient Supply Networks and Sustainable Supply Chains

Message from the Guest Editor

In the realm of modern commerce, the emergence of sustainable supply chains represents a pivotal shift towards harmonizing economic growth with environmental and social responsibility. Supply chains, once considered mere conduits for products and services, have evolved into dynamic ecosystems with profound implications for sustainability. The aim of this Special Issue is to delve into the complexities of creating environmentally, economically, and socially responsible supply chains. Our Special Issue bridges theory and practice, offering insights that resonate not only with the academic community but also with policymakers and practitioners, contributing to the broader mission of promoting sustainability in all its dimensions. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Carbon footprint reduction;
- Resilience and risk management;
- Waste reduction and recycling strategies;
- Circular economy models;
- Consumer behavior and sustainable choices.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
