Sustainable Marine Ecosystem: Conservation, Functioning, and Resilience

Message from the Guest Editor

In a world where seas and oceans are overexploited and constitute bins for solid and liquid waste, with all the harmful consequences on flora, fauna, and the quality of marine waters, it is urgent to publish and raise public awareness for the defense and protection of the marine environment. Marine biodiversity is essential for meeting the world's food needs. Climate change is increasingly present in the world through the frequency of droughts and floods. Oceans are mitigators of these climate changes, hence the importance of conserving the marine environment and its biodiversity. All coastal countries are threatened and are called upon to contribute to preserving their living natural marine resources and also fighting climate change. Today's world is not only aimed at production, but also at conservation and sustainable development. Indeed, according to UNESCO, it is the Decade of the Oceans 2020–2030.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
