

Special Issue

Management in the Built Environment for Sustainable Urban Development: Driven by Future Technological Transformation

Message from the Guest Editors

As global urbanization advances high-quality development, the built environment faces urgent challenges. Technological transformation is key to resolving them, making tech-driven built environment governance and sustainable urban development synergy a critical academic and industrial focus. Sustainability launches this Special Issue to tackle these challenges. Focusing on future technologies (big data, AI, digital twins, etc.), it will build an interdisciplinary platform, advance theoretical innovation and tech translation, and provide scientific support for "people-space-industry-ecology" harmony and global sustainable urban development. This Special Issue welcomes original research and review articles on the following (non-exhaustive) topics:

- Health-Oriented Optimization and Management of Built Environments
- Sustainable Protection and Activation Management of Historical Districts
- Coordinated Development and Management of the Built Environment and the Economy and Industry
- Revitalization and Reuse Management of Inefficient and Idle Land
- Integration Management of Low-Altitude Economy and Built Environment

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
