Special Issue

Circular Economy Transition towards Sustainable and Healthy Agro-Food System

Message from the Guest Editors

The agri-food system is called to lower the impact of its productions on the environment by contributing to mitigating climate change, jointly adapting to its impacts. Besides that, the agri-food system is called to produce safe, healthy, and nutritious foods for the entire population, which is encouraged to consume locally and sustainably produced foods supporting the economic resilience of the rural communities. Additionally, sustainable food consumption is promoted by encouraging individuals to switch towards a plant-based diet. Thus, all actors in the agri-food system are all called on to take action for the development of a sustainable and healthy agri-food system. This Special Issue aims to collect a selection of original and innovative articles as well as review articles related to production strategies and practices carried out by farmers and producers to mitigate the impact of production on the environment, including those adopting sustainable circular economy paradigms. Additionally, the Special Issue aims to collect original articles and reviews on sustainable and healthy consumption.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
