

Special Issue

Technologies and Innovations for Sustainable Storage and Transportation of Oil and Gas

Message from the Guest Editors

Energy is an essential resource for social operation, and oil and gas are the main types of energy consumed in the world today. Certainly, the oil and gas storage and transportation process itself also consumes a great deal of energy, which cannot promote production or create economic benefits. Under the concept of energy conservation, green environmental protection and low-carbon economic development, if the petroleum industry wants to reduce energy consumption and achieve sustainable development, it is necessary to practice energy-saving design for oil and gas storage and transportation systems in order to reduce energy consumption and improve the comprehensive economic benefits. In this Special Issue, we aim to publish state-of-the-art research concerning sustainable energy-saving technologies in oil and gas storage and transportation, and to present and highlight the revolutionary paradigms and methodologies in this field.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
