

## Special Issue

# Urban Intelligent Traffic System Control and Optimization

### Message from the Guest Editors

How to improve the transportation capacity is currently one of the most important directions for research on the development of urban traffic systems. It is envisioned that intelligent driving will provide enabling key technologies to enhance transportation efficiency, reduce traffic incidents, improve safety, and mitigate the impacts of traffic congestion. The aim of this Special Issue is to present a collection of high-quality research papers on recent developments, current research challenges, and future directions in the use of intelligent driving to realize an urban intelligent traffic system that is safer and more efficient. Potential topics include but are not limited to the following: 1) Energy efficiency and sustainability of urban public transportation 2) Networked information processing, decision making, and intelligent control 3) Rail system modeling and optimization 4) Trajectory prediction and motion planning in intelligent driving 5) Intelligent transportation, rail traffic modeling, and decentralized congestion control 6) Role of artificial intelligence and operations research in urban traffic system control

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
