

## Special Issue

# Sustainable Infrastructure Engineering and Reliability of Condition Assessment

### Message from the Guest Editors

This Special Issue aims to compile articles on a wide range of topics related to the sustainable and resilient engineering of infrastructure, as well as the reliability of condition assessment in general. We welcome papers that refer mostly to civil applications of: surface infrastructure (roads, bridges, railway, etc.), air transportation (passenger airlines, drones, etc.), and utility infrastructure (electrical power, gas, water, etc.). The risk and reliability assessment and the condition assessment of infrastructure, as well as resiliency-related topics, are also included in the scope of this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
