

Special Issue

Ecosystem Sustainability, Soil Biodiversity, and Environmental Restoration

Message from the Guest Editors

Ecosystem sustainability, biodiversity conservation, and environmental restoration have become core issues in achieving the United Nations Sustainable Development Goals (SDGs) in response to intensifying global climate change, escalating land use intensity, and persistent threats of ecosystem degradation. We need to understand the coordinated response relationships between ecosystem sustainability, biodiversity conservation, and environmental restoration across different spatial and temporal scales, considering both natural factors and anthropogenic activities. These understandings aim to provide policymakers and land managers with innovative and reliable evidence and knowledge for achieving sustainable utilization and protection of ecosystems. This Special Issue aims to provide a platform for exchanging and publishing cutting-edge research on ecosystem sustainability, soil biodiversity, and environmental restoration. Scholars are welcome to submit original research articles, review papers, and case studies that build bridges connecting ecosystem sustainability, soil biodiversity, and environmental restoration.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
