

Special Issue

Sustainable Development of the Tourism Economy

Message from the Guest Editors

Tourism activity is a complex activity, with multiple implications in economic and social life. If, at its beginning, tourism had social implications as a priority, today, through the economic implications it generates, it is seen as an important factor of economic development. This change of position does not denote a diminution of the social importance of tourism, but, more importantly, indicates a close correlation between the two phenomena.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

Research regarding the development of tourist activity in an area and its socio-economic implications;

Highlighting the implications of the multiplier effect of tourism in the sustainability of the areas under study;

Strategies regarding the launch of sustainable tourism products on the market, aiming at the expansion of the tourist market and the sustainable development of tourist areas;

Proposals regarding the development of sustainable tourism businesses, with major implications for the socio-economic development of resident communities.

Guest Editors

Dr. Tabita Adamov

Prof. Dr. Iancu Tiberiu

Prof. Dr. Gabriela Popescu

Dr. Ramona Mariana Ciolac

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
