Special Issue

Decision Making in Sustainable Supply Chain Management: Recent Research Advances in the Context of Industry 4.0

Message from the Guest Editor

The objective of this Special Issue is to host papers which present and analyze new methods and state-of-the-art applications concerning decision-making in supply chain management in the inter-relating contexts of Industry 4.0 and sustainability. To this end, we invite studies concerning the integration process of new technologies and the implementation of the life cycle analysis concept on developing supply chains for goods, energy, the agricultural sector, etc. In this Special Issue, original research articles, reviews, and case studies are welcome. Research areas may include (but are not limited to) the following:

- Supply chain management in the era of digital transformation:
- Green supply chain management;
- Renewable energy value chains;
- Circular supply chain management;
- Big data and predictive analytics to support supply chains;
- Internet of Things applications;
- Simulation and digital twins in supply chains;
- Single- and multi-objective optimization techniques and applications;
- Multi-criteria decision-making in supply chain management;
- Risk management in supply chains;
- Innovative decision support systems for supply chain management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
