# Behavioral Changes towards More Sustainable Travelling

## Message from the Guest Editor

One of our jobs as transportation researchers is to evaluate the effectiveness of measures and interventions and to estimate how these measures affect travel demand volumes or model utilization. However, we all are aware that measurement and identification are complex. Surveys on travel behavior measure travel quantities at a certain point of time. Repeated surveys, e.g., before-and-after studies show that aggregated demand volumes potentially remain unchanged over time; however, these aggregated figures hide those intra-individual changes which compensate for each other.

Against this background, an improved understanding of what changes behavior and how these changes can be quantified is necessary. Thus, the aim of this Special Issue of Sustainability is twofold:

In terms of the survey data, we need to break down the changed quantities into the different underlying reasons and processes. The identification and measurement of changes but also their interpretation and assignment to causes (policies and interventions, structural as well as lifestyle changes, changed attitudes and random effects) are of central importance.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

# Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

## **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
