Big Data and Sustainability

Message from the Guest Editors

Big Data is transforming the managerial, engineering, environmental, medical, and even social world. Nowadays, the competitiveness of firms, the environment, society, the development of sciences, or the evolution of humanity cannot be understood without looking at the new processes surrounding Big Data. In the new ubiquitous environment, a result of the increasing relevance of the “Internet of Things”, “pervasive and ubiquitous computing”, and the evolution of semantics or “Web 3.0 Era” (Garrigos et al., 2012), people, scientists, and organizations need to understand these transformations to ensure continual adaption to these changes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
