

## Special Issue

# Sustainability in Biology, Geography and Interdisciplinary Studies and Sustainable Pedagogies

### Message from the Guest Editors

This Special Issue aims to publish high-quality research papers on Biology, Geography, Health Education, and interdisciplinary studies in the field of sustainability education. One of the goals for the future is to achieve a sustainable society through the process of sustainable development. The concept of sustainable development is based on the concept of socioeconomic development in line with ecological constraints. The concept of needs requires a redistribution of resources to ensure the quality of life and basic needs for present and future generations. The research to be presented in this Special Issue will focus on student teachers', on students' and pupils' or educators' competence and awareness in addition to conceptions and concepts and other relevant issues of human environmental relationships in the domains of environmental or ecological, social, cultural, and economic sustainability.
