

Special Issue

Processes for Manufacturing Biodegradable Particles for Energy, Environmental and Health Applications

Message from the Guest Editors

The need to ensure sustainability to preserve our planet has led to the demand for sustainability in manufacturing. The demand for sustainable particles has risen in recent years, due to their wide application in industries such as the energy, drug delivery, personal care, and agricultural industries. The formulation and manufacturing of such particles, therefore, must imbibe characteristics of being inherently biodegradable and compatible with the systems to which they are to be used and discarded. The aim of this Special Issue is to provide a much-needed interdisciplinary platform for the presentation of new frontiers in the research of sustainable particle manufacturing, ranging from the nano- to macro scale.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
