

Special Issue

Biodiversity and Ecosystem Services for Environmental Sustainability

Message from the Guest Editor

The purpose of this Special Issue is to initiate a discourse and exchanging of views, and to present the latest research results on the essence of biodiversity in the use of natural ecosystems to maintain a natural balance. This Special Issue also aims to highlight an assessment of the condition of natural ecosystems, the threats resulting from anthropological activity, and the consequences of climate change on biodiversity, with a proposal of ways to alter the use of environmental resources in line with sustainable development. A dialogue conducted by scientists from various fields, will be very useful and will strengthen the interdisciplinary aspect of this Special Issue, enriching the literature in this field. The results of the presented research on the protection of biodiversity, and thus the pursuit of sustainable development, will allow for the broadening of the worldview on this topic from various perspectives, and the indicated proposed directions for the protection of biodiversity in natural ecosystems may become a useful guide for scientists and politicians in various countries.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
