Special Issue

Sustainability, Circular Economy and Bioeconomy Practices in Resilient Supply Chains

Message from the Guest Editors

Supply chain sustainability, circular economy (CE), and bioeconomy practices have attracted global attention for achieving sustainable development goals, CE and bioeconmy are system-wide concepts of sustainability when viewed as a regenerative system. However. sustainability, CE, and bioeconomy practices go beyond a given firm's borders and require a concerted collaborative effort among supply chain entities. Recently, supply chain resilience has also become an important phenomenon in light of the COVID-19 pandemic and other disruptions. While the importance of resilience, sustainability, CE, and bioeconomy practices as a source of competitive advantage cannot be overemphasized, not much understanding exists on how sustainability, CE, bioeconomy, and resilience practices co-exist and/or influence each other. This special issue provides an opportunity to address intersections of sustainability, circular economy, and bioeconomy concepts in the context of resilient supply chains. Researchers are encouraged to submit articles from the perspective of operations and/or supply chains practices, strategies and/or policy formulations using innovative methods, tools, and techniques.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
