

Special Issue

Advanced Bioengineering Technology and Biomaterials in Application for Sustainable Water Management

Message from the Guest Editor

This Special Issue of *Sustainability* will focus on the present (especially advanced) technologies for water and wastewater management and treatment using sustainable materials such as biopolymers, agricultural wastes, organic solid wastes, industrial by-products, etc., that are applied in treatment technologies including ion exchange, coagulation and flocculation, membrane technology, aerobic and anaerobic bioreactors, and chemical precipitation, to name a few. This issue welcomes the submission of review papers, short communication and regular research articles. Abstracts in conference proceedings in line with this theme can also be submitted to this issue.

Guest Editor

Dr. Cybelle Concepcion M. Futralan

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
