

Special Issue

Sustainable Biomass Materials for Building and Engineering Applications

Message from the Guest Editors

The built sector is a significant component of energy demand and use worldwide. Building materials with high embodied could contribute significantly to CO₂ emissions. To drive down energy consumption and CO₂ emission, we promote the development of sustainable bio-based building materials and products with low embodied energy and decarbonize on-site electricity and thermal energy usage by using renewable and clean energy. Therefore, researchers and scholars need to introduce and utilize innovative technologies, new methods, and processes to develop novel sustainable bioproducts and evaluate their performance when applied in the building systems to meet zero-carbon and zero-energy requirements.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
