Biopolymers from Agri-Food Wastes: Prospects and Sustainability Challenges

Message from the Guest Editor

Finding sustainable practical solutions and potential applications for agri-food wastes is a much-desired focus of research in the present decade. Applying novel concepts and sustainable strategies for reduction of agri-food wastes coupled with maximal utilization for producing value-added compounds/products can not only support the economy, but also contribute towards reducing the stress on the environment. Understanding the basics of minimizing loss and wastage along the entire agri-food supply chain can benefit producers, consumers and dependent industries. However, designing appropriate sustainable value-added chains and business models remains a prerequisite to attain much-desired success. In this Special Issue, we invite original research articles, short communications and reviews that focus mainly on recognising present gaps, overcoming sustainability challenges and identifying future opportunities to produce biopolymers from agri-food wastes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
