

## Special Issue

# Bioprocess Advances for Renewable Energy and Environmental Sustainability

### Message from the Guest Editors

In recent decades, bioengineering and bioprocess applications for energy and environment sustainability have attracted attention at a global scale. Some of the major applications of bioprocess are toward the integration of environmental management practices (such as wastewater treatment and solid waste management) with possible resource and energy recovery. The present Special Issue entitled “Bioprocess Advances for Renewable Energy and Environmental Sustainability” is therefore conceptualized to compile recent technological developments in the area of environmental bioprocess and bioenergy.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
