

## Special Issue

# Sustainable Building Energy Analysis

### Message from the Guest Editors

As one of the largest sectors in terms of energy consumption, buildings consume 30% to 75% of primary energy. With the development of sensing technology and internet of things (IOT), an increasing amount of data is collected in buildings. How to analyze these data to improve the energy efficiency of buildings becomes a critical challenge for sustainable development. At the design stage, some passive or sustainable technologies are considered, and renewable energy has been widely used in buildings. At the operation stage, building energy analysis is essential for building control optimization to promote energy efficiency, the big data analysis and machine learning methods also have been increasingly utilized to support applications relevant to buildings. At the retrofit stage, building energy modeling can facilitate the evaluation of energy conservation measures for existing buildings. This Special Issue focuses on recent research in building energy analysis for sustainability. The scope includes the above mentioned topics. The aim of this issue is to provide an interactive platform and share current ideas from experts in the related fields.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
