

Special Issue

Towards Climate Change Resilience in the Building Sector: Methodologies, Solutions, Case Studies

Message from the Guest Editors

This Special Issue seeks contributions exploring the effects of climate change on the building sector and to address possible solutions to these issues. This Special Issue also welcomes contributions aiming to support and advance the UN's 17 sustainable development goals (SDG), particularly SDG 11 (Make cities and human settlements inclusive, safe, resilient and sustainable) and SDG 13 (Take urgent action to combat climate change and its impacts). In relation to the above-described context, the focus of this Special Issue will be on, but not limited to, the following topics:

- New methodological approaches for assessing the effects of climate change on the building sector;
- Analyses of future trends and pathways of the building sector energy demands;
- Net-zero energy buildings' climate resilience;
- Building resilient designs to extreme weather events;
- Ecodesign strategies for high-performance buildings and urban environments;
- Energy, environmental, economic and social assessment of buildings and building technologies;
- New approaches to sustainable zero energy building development

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
