

Special Issue

Dynamic and Interactive Thermal Energy Storage Solutions for Buildings

Message from the Guest Editors

It is significant to maintain effective thermal energy use in buildings as a crucial source for carbon emission mitigation and energy sustainability. Thermal energy storage is an important pathway that stocks thermal energy by heating or cooling a storage medium so that the stored energy can be used at a later time for heating and cooling applications and power generation. It is of big significance to find dynamic and interactive thermal energy storage solutions for buildings to achieve building energy flexibility for achieving carbon neutrality. We are organizing a Special Issue entitled “Dynamic and Interactive Thermal Energy Storage Solutions for Buildings”, aimed at reporting the most recent new finding from researchers and sector professionals in the scope of relevant themes. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Advanced thermal energy storage technologies for buildings;
- Phase-change materials for thermal energy storage in buildings;
- Thermal energy storage integration with renewable energy;
- Thermal energy storage and building energy flexibility.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
