

## Special Issue

# Business Models and Innovation for Sustainability Transition

### Message from the Guest Editors

During the last decade, there has been growing interest in business models among entrepreneurs and corporate leaders, politicians, and researchers, especially when it comes transformative system innovations enabling systemic change in our economy.

Business models enable systemic change and transformation; therefore, holding a deeper understanding of the interdependencies inherent in the concept are crucial, with further aspects requiring more understanding, such as behavioural change, sustainable funding taxonomy and investments, corporate responsibility, and social justice as conditions for sustainable business models.

In this Special Issue, original research articles, literature reviews, methods, tools, scientifically sound case studies, and approaches are welcomed, including topics managing the complexities inherent in sustainable business models, the relationship between system thinking and sustainable business modelling, leadership for systemic change, sustainable entrepreneurship, behavioural changes, growth models, and their critics, etc., bringing to light the above described phenomena.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
