Business Success Through Sustainability in the Post-COVID-19 Era

Message from the Guest Editors

The COVID-19 pandemic has wreaked havoc on the global economy, causing business failure and global recession. Consequently, previously planned investments in sustainable projects, energy efficiency, and environmental preservation are expected to experience downward revisions. The significant pandemic-induced slowdown in economic activities affects sustainable projects negatively. Thus, it poses a significant threat to sustainable economic growth. Accordingly, new economic and business policies may be required to curtail these negative effects of the pandemic on sustainable projects. This Special Issue of *Sustainability* is seeking theoretical, empirical, and policy-oriented papers which deal with the future of business success through sustainability in the post-COVID-19 world. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
