Special Issue

Climate Change Impacts and Sustainable Tourism

Message from the Guest Editors

Climate change is having a significant impact on tourist destinations around the world. Rising temperatures are transforming landscapes and affecting natural attractions such as beaches, forests, and glaciers. Coastal areas are facing an increased risk of rising sea levels, leading to erosion and flooding that threaten tourist infrastructure. Extreme weather events including heatwaves, hurricanes, cyclones, and wildfires are also disrupting travel plans and damaging tourism facilities, leading to financial consequences and endangering people's wellbeing. These changes in the biophysical environment not only affect competitiveness between tourist destinations, but also cause fluctuations in international tourist flows. This Special Issue compiles interdisciplinary research on climate change and tourism, aiming to foster sustainable practices that promote adaptation and mitigation within the tourism sector in many countries or regions across the world.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
