

## Special Issue

# Sustainable Poultry Production

### Message from the Guest Editors

Poultry (laying hens, meat chickens, turkeys, quails, and ducks) is the most efficient modifier of feed to meat or eggs, and it is also produced using less water than other animal protein food. By varying how birds are fed and reared, poultry production can easily move towards carbon-neutral production. This Special Issue aims to gather research and case studies displaying the benefits of poultry production towards sustainability challenges and presenting new ways to produce animal protein without harming the environment. Papers related to feeding and nutrition, alternative animal feeding sources, rearing environments and applied technologies, precision poultry farming concerning sustainable production, evaluation methods, energy analysis, energy balance, slaughter processes, residue treatment and re-use, sustainable development perspectives of poultry production, and circular and bioeconomic production systems are welcome.

### Guest Editors

Dr. Irenilza De Alencar Nääs

Graduate Program in Production Engineering, Universidade Paulista, R. Dr. Bacelar 1212, São Paulo 04026-002, Brazil

Dr. Nilsa Duarte Da Silva Lima

Animal Science, Federal University of Roraima, Boa Vista 69310-000, Brazil

### Deadline for manuscript submissions

closed (30 July 2023)

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

## Editor-in-Chief

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
