

Special Issue

Industrial Digital Transformation: Sustainable Challenges for SMEs

Message from the Guest Editors

This Special Issue aims to bring together innovative theories on the sustainable development of small- and medium-sized enterprises (SMEs) in the era of digital economy, with a particular focus on how SMEs can leverage digital technologies to enhance energy efficiency and promote low-carbon sustainable development. This encourages the submission of case studies that focus on specific companies, provided they are representative and yield general insights. It also welcomes empirical analyses of SMEs' sustainable practices, using public data such as the World Bank's Enterprise Survey database, as well as author survey data. However, bibliometric articles are not encouraged in this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
