

## Special Issue

# Innovative Strategies for Marine Conservation, Safety, and Sustainability

### Message from the Guest Editors

This Special Issue, “Innovative Strategies for Marine Conservation, Safety, and Sustainability”, will focus on advancing integrated approaches that address ecological protection, maritime safety, and post-disaster recovery in marine and coastal environments. We invite interdisciplinary contributions from engineering, natural sciences, social sciences, and policy studies that propose new strategies, technologies, and frameworks for sustainable ocean use. The purpose of this Special Issue is to highlight how conservation, risk reduction, and resilience can be combined to create comprehensive solutions that go beyond prevention to include response and long-term restoration. This Special Issue will supplement the existing literature by linking ecological sustainability with disaster management and operational safety—areas that are often studied separately. In doing so, it will emphasize advancements in sustainability practices in alignment with the United Nations 2030 Agenda, particularly those integrating scientific, socio-economic, and governance perspectives to strengthen the resilience and sustainable development of marine systems.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
