

# Special Issue

## Research on Water and Soil Conservation

### Message from the Guest Editors

This Special Issue is open to advanced research on soil and water conservation, soil water content, soil hydrological processes, soil infiltration, runoff discharge at different scales, plant–soil relationships, and soil erosion. Additionally, research on ecosystem hydrological services, functions, and sustainable development will also be considered for this Special Issue, as it also fits within the scope of the journal. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Advanced theoretical innovation, creative methods, and novel findings of soil and water conservation;
- The relationship among environmental factors, runoff, soil erosion, and soil and water conservation;
- Responses of soil hydrological process and water storage to land use change or various environmental conditions;
- Dynamic processes and mechanisms of soil erosion under changing environment conditions;
- The effects of ecological restoration on eco-hydrological processes.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
