

## Special Issue

# Emerging Contaminants and Their Remediation for Sustainable Fisheries and Aquaculture

### Message from the Guest Editors

Emerging contaminants, also known as contaminants of emerging concerns (CECs), are synthetic chemicals or biological agents (e.g., micro/nanoplastics, PAHs, PFAS, microorganisms, etc.) that have recently been recorded in all parts of the Earth's ecosystems. These chemicals are usually not routinely monitored and are mostly persistent and either poorly or non-biodegradable. They stay in the ecosystems for a long time and enter the food chain, which has the potential to harm the environment and have a negative impact on human and/or ecological health. Fisheries and aquaculture play a significant role in livelihoods, poverty reduction, and food security throughout the world. The establishment of combined regulatory guidelines, waste management techniques, and remediation strategies is urgently needed for sustainable fisheries and aquaculture growth. In this Special Issue, topics on monitoring, transfer, fate, risk assessment of emerging contaminants in aquatic bodies and their remediation strategies will be covered. Authors are invited to submit original research papers, reviews and short communications.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
