

## Special Issue

# Water Pollution and Risk Assessment

### Message from the Guest Editors

At present, pollutants are emerging in the global marine environment, which not only pose potential hazards to aquatic organisms but also indirectly affect human health. What is more, the assessment of the interaction between pollutants and compound biological effects also deserves high priority. Increasing attention to these sectors has led to a better understanding of the challenges posed by water pollution and the need to assess its impact on human health. This Special Issue (SI) will focus on the issues associated with the emergence of current water pollutants, further health risk assessment, and corresponding solutions associated with the alleviation of water pollution. Submissions of original and high-quality research on all relevant branches are strongly encouraged. Topics of interest for this SI include but are not limited to:

- Investigation of water pollution
- Health risk assessment of the effect of pollutants on organisms
- Interaction between/among pollutants
- Compound biological effects of pollutants on organisms
- Corresponding solutions associated with the alleviation of water pollution
- Data analysis and modeling for water pollution

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
