

Special Issue

Energy Systems, Industrial Engineering and Sustainable Green Innovation

Message from the Guest Editor

By exploring the synergy between energy management, industrial engineering, and green innovation, we aim to showcase solutions that are not only technologically advanced but also ethically grounded. This Issue goes beyond technical solutions, diving into the heart of what makes innovation impactful. Topics such as renewable energy integration, efficient manufacturing techniques, and sustainable product development take center stage. However, innovation does not thrive in isolation. Despite the rapid growth of research in energy systems and industrial engineering, much of it remains fragmented across disciplines. This Special Issue bridges these gaps, seeking to spark conversations that inspire fresh perspectives and actionable insights. Meaningful solutions must address not just environmental concerns but also the social and economic dynamics that determine their adoption on a global scale. By weaving sustainability into the core of industrial progress, we can champion transformative change that benefits all. Through carefully curated articles and case studies, we invite you to join a dialog grounded in evidence yet open to innovation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
