Maritime Research: Challenges for Carbon Neutrality in Context of COP 26

Message from the Guest Editors

The world is facing various challenges in order to cater to carbon neutrality, especially in the context of the COVID-19 pandemic. Developed countries must achieve net-zero emissions and accelerate their decarbonisation efforts to free up some global carbon budget for developing countries such as India as they transition to a low-carbon development path.

Sustainability is a critical platform for exploring issues related to human beings' environmental, cultural, economic, and social sustainability, as well as issues in policy perspectives pertaining to sustainable developmental goals. Similarly, it is an excellent platform for studies on the issues associated with carbon neutrality in the context of COP26 targets. The objective of this Special Issue includes investigating and examining the challenges for attaining carbon neutrality in the perspective of COP26 targets, specifically in the maritime research area. Submissions that adhere to the principle of academic quality in terms of their significance, uniqueness, and rigour will be considered for publication in the Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
