

Special Issue

Environmental Carrying Capacity in Urban and Regional Development

Message from the Guest Editors

Guaranteeing the stability and sustainability of the socio-environmental system is one of the most important tasks for the modern generation. In order to minimize the negative impact of human activities on the natural environment, it is necessary to effectively diagnose the current state of the built and natural environment. This Special Issue aims to present cross-disciplinary approaches, methodologies, and applications that can be incorporated as decision support systems for more sustainable urban and regional development. We invite submissions from researchers in environmental protection and development, urban planning, geography, public policy, and other disciplines, including cross-disciplinary fields. Relevant topics include, but are not limited to: environmental carrying capacity; urban and regional development; ecological footprint; biocapacity and ecosystem services; landscape capacity and assessment; environmental impact assessment; human impact assessment; resilience assessment and mapping; sustainability risk assessment; and geospatial analyses.

Guest Editors

Prof. Dr. Szymon Szewrański

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
