

## Special Issue

# Changes, Challenges and Commitments for the Future of Cities

### Message from the Guest Editors

The changes that the city is experiencing due to the new phase of demographic transition and the strong process of urbanisation add up to the changes resulting from the need for greater urban sustainability and the disruptive fracture of life patterns caused by the Covid-19 pandemic. This Special Issue is concerned with, but not limited to, methodologies, applications, best practices and overviews about changes and consequent commitments for decision makers and it focuses on the commitments for the future of cities. In particular the main topics are:

- strategies in urban land use;
- challenges for local public transport companies;
- changes in traditional transport services;
- development of innovative transport services
- study of urban transport demand for an increasingly ageing population

Other, synergistic topics can be accepted in this special issue.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
