Challenges in the Integrated Physical–Virtual Modeling of Sustainable Smart Cities

Message from the Guest Editors

Nowadays, human activities are transforming from offline (physical space) to online (virtual space), in particular, during the pandemic. It is expected that this trend will continue even in the future new normal after the pandemic time. The contexts of human daily activities are moving beyond places in physical space to being in a hybrid of physical-virtual space. The co-existence of physical and virtual human activities has complexified the interactions between human and the environment. In this context, this Special Issue “Challenges in the Integrated Physical–Virtual Modeling of Sustainable Smart Cities” welcomes research papers on current and future innovations in urban systems for more sustainable operation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
