

## Special Issue

# Challenges for Sustainable Entrepreneurship in the Context of U.N. 2030 Agenda for Sustainable Development

### Message from the Guest Editors

The 2030 Agenda for Sustainable Development, adopted by the United Nations a few years ago, addresses the most pressing challenges of our time, generated by enormous disparities of opportunity, wealth and power, such as climate change, social injustice, human rights and economic growth. At its heart, are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries—developed and developing—in a global partnership. They recognize equitable sustainable development as all that ends poverty and other deprivations, which must go hand in hand with strategies for sustainable development that improve health and education, reduce inequality, and spur economic growth—all while tackling climate change and working to preserve the natural habitat.

Sustainable entrepreneurs are our best hope to achieve the SDGs, working within a network of like-minded visionaries and innovators. This Special Issue of the Sustainability journal aims to document cases of sustainable entrepreneurship across the world and to accelerate knowledge about what works and could be amplified.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
