

## Special Issue

# Sustainable Use of Natural Resources in a Changing Climate

### Message from the Guest Editor

Over the last twenty years, the global population has grown by more than 30% and it is estimated that by 2050 it will reach above 9 billion people. This population growth, combined with an increasing preference for animal-based and processed food, has been a key driver of forest clearance for agriculture and infrastructure, posing a risk for our sustainable future. Anthropogenic climate change and land degradation are increasing pressure on land and water resources, threatening the biodiversity and stability of terrestrial ecosystems. Forests play a significant role in climate change mitigation. To keep global warming below 2 °C, we need to reduce our reliance on fossil fuels, maintain and increase forest carbon stocks, introduce sustainable living, improve the efficiency of agricultural production, and reduce food waste. This Special Issue calls for papers that promote sustainable living and focus on aspects of sustainability as they relate to forests, emission reduction, biodiversity, and the maintenance of the health and vitality of terrestrial ecosystems.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
