

Special Issue

Characteristics, Health Risk Assessment and Sustainable Management of Air Pollutants in Asia

Message from the Guest Editors

This Special Issue is open to articles on the air pollution monitoring, air quality and health risk assessment, and sustainable risk management systems, with a special focus on particulate matter, including ultrafine particles that have special physical and chemical properties, even if toxicological evidence has not yet been fully established in human studies. We welcome papers on Asian pollution monitoring, exposure analysis, epidemiology, toxicology, and risk assessment, focusing specifically on the processes affecting the hazards of ultrafine particles on human health. Research papers, analytical reviews, case studies, conceptual frameworks, and policy-relevant articles are solicited. The will select high-quality research to proceed with blind peer review. Reviewers will be selected from researchers active in the field, whose works are present in international databases.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
