

## Special Issue

# Sustainable Chemistry, Environment, Energy, and Economic Policies

### Message from the Guest Editors

This Special Issue provides a unique platform to present state-of-the-art research findings in all fields of sustainability, especially in chemistry, environment, materials, energy, and economics, and aims to promote innovative solutions associated with the development of sustainable technologies. We hope to facilitate and encourage interdisciplinary researchers to provide multi-faceted solutions with sustainable systems. Contributions investigating sustainability-related issues in chemical engineering/chemistry, environmental science/engineering, materials/energy science/engineering, and related economics are welcomed.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
