

## Special Issue

# Circular Economy Evaluation: Towards a Transparent and Traceable Approach under a Life Cycle Perspective

### Message from the Guest Editors

Apart from the development of efficient and sustainable technologies to be integrated into existing value chains, one of the main challenges to meet circular economy goals consists of defining a proper metric for circular economy strategies. In this light, ensuring the traceability of the information throughout the whole value chain is a key point to determine the real impact of circular economy strategies as well as avoiding double-counting or green-washing problems. We would like to encourage you to submit original scientific papers aimed at increasing the level of knowledge on circular economy measurement, data quality analysis, and the integration of circular economy evaluation under a life cycle approach as well as at defining the requirements for the proper evaluation of circular strategies. The purpose of this Special Issue is to provide more insight into the interpretation and management of circular economy.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
