

## Special Issue

# Circular Economy in the Service Sector: Current Situation and Future Perspectives

### Message from the Guest Editors

Using the scarce resources of the planet efficiently is critical to providing humanity with a prosperous future. Circular economy has a key role to play in achieving this objective. That is why, at present, circular economy is one of the most popular topics in global research. So far, researchers have focused their attention on the productive industry and other polluting sectors, leaving aside other relevant sectors such as tourism or other service industries in general. In this sense, this Special Issue aims to cover this gap in the research. Qualitative, quantitative studies, analyses of current regulations, bibliographic reviews, case studies or examples of good practices will be welcome in this Special Issue.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
