

Special Issue

Circular Economy and Sustainable Business Performance Management

Message from the Guest Editors

This Special Issue will highlight new opportunities and challenges for Circular Economy and Sustainable Business Performance Management, focusing on technological advancements and management initiatives, including public–private partnerships between stakeholders. We welcome papers on:

- The use of design practices to specifically empower product design and development according to specific measurement performances, such as design for X guidelines and checklists, and to give strategic directions to shift the linear lifecycle into a circular one;
- The development of methods and practices able to systematically and practically measure and assess the circularity degree of a given system and to take into account all the heterogeneous resources involved in its lifecycle;
- The development of a Circular Economy maturity model, based on the definition of a set of KPIs for CE performance assessment, aimed at both defining companies' level of readiness in terms of circularity and proposing a roadmap to better address CE;
- Future perspectives on Circular Economy and Sustainable Business Performance Management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
