Circular Economy for Sustainable Development

Message from the Guest Editors

The circular economy is considered a promising approach toward sustainable development and is increasingly attracting a significant amount of attention from governments and companies. In the European Union, for example, The Circular Economy Action Plan is one of the main pillars of the European Green Deal. In companies, diverse circular economy programs have emerged to drive sustainability visions, for example, Novo Nordisk's Circular for Zero strategy. The enhanced commitment to circular economy within sustainability agendas is definitely a positive sign. However, if not properly planned and executed, a circular economy might not lead to more sustainable solutions. Many variables and trade-offs need to be analyzed to achieve a suitable balance among economic, environmental and social aspects. Moreover, it is important to manage rebound effects that might appear as unintended consequences of proposed actions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
