

Special Issue

The Adaptability of Cities to Climate Change

Message from the Guest Editors

Nowadays, the growing urbanization and the complex patterns of urban economic assets, infrastructure, and services make cities particularly vulnerable to climate change. Urban climate adaptation has a pivotal role in broader urban sustainability; therefore, the complex relationship between these phenomena contributes to increasing the interdisciplinary feature of potential studies.

This Special Issue welcomes papers covering studies dealing with climate change adaptation in cities with particular reference to analysis of urban adaptation plans; mitigation co-benefits of climate change adaptation strategies; approaches to increase city resilience to climate change; climate information and alert systems for citizens; experiences and case studies; monitoring and evaluation systems for urban adaptation plan implementation; analyzing potential lock-ins in urban development; theoretical and practice-oriented studies in urban vulnerability analysis; understanding of adaptation responses in terms of synergies and trade-offs with SDGs.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
